# Quality Services For All Project Phases

DWB provides surveying services for all phases of projects, from feasibility, planning, and preliminary engineering, to detailed design, specification development, and through to construction layout, QC, as-built and supervision, and operational-phase inspections and certification. Our team of Engineers and Technicians specializes in legal land surveys and geomatics services including topographic land surveys, hydrographic/bathymetric surveys, and UAV (RPAS 'drone') surveys, and are supported by an inter-disciplinary team from DWB's Environmental and Forestry divisions to ensure that our clients' needs are met effectively and comprehensively.

Our past clients have included contractors and owners associated with: First Nations, transportation, mining, utilities, oil and gas, and forestry, and DWB stands ready to meet the needs of its future clients requiring surveying services.
